

Fire Protection and Safety Solutions

MOBILE MAINTENANCE WORKSHOP

Mobile Services for Fire Extinguishers / Fire Alarm Systems
Fire Trucks / Fire Hydrants / Sprinkler Systems / Fire Suppression Systems

MINIMUM DOWNTIME - MAXIMUM CONVENIENCE

WE BRING SERVICE TO YOUR DOOR STEP

The maintenance team is currently facing unprecedented pressure. The volume of tasks required to be accomplished during shutdowns has reached new heights, and the allocated time for maintenance is now more constrained than ever. This is the driving force behind the introduction of the new Mobile Maintenance Workshop by Safety First. This innovative service brings the maintenance facilities directly to your location, offering a means to conserve time, financial resources, and energy.

With the Safety First mobile workshop, all the specialised equipment, tools, and expertise necessary for tasks like refilling, testing, servicing, and repairing are brought directly to your site, eliminating any unnecessary complications. The presence of advanced diagnostic equipment on the mobile workshop allows us to assess your Fire Fighting Systems on-site, empowering you to promptly make decisions regarding repairs or replacements. As a result, service durations can be reduced by as much as 50%*.
